

“I learned more in one day than I usually do in a year of other track experience.”

Thursday, 05 January 2012 14:50 - Last Updated Sunday, 27 July 2014 12:42

I found the program to be exceptionally professional and customer oriented. We were treated like valued members of the Boss and Ford families in every way throughout the program. The special touches were especially appreciated; such as having the driver's name on the windshield. Although I have over five years of track experience with other Ford products, I learned more in one day than I usually do in a year of other track experience. The significant difference of this program is that the participants receive training from professional racing drivers rather than a typical track day instructor. Buying a Boss 302 and not attending the Boss Track Attack is like buying a new power tool and not reading the instructions. You just get so much more out of owning the car.
